

Hello,

I have been notified by my ISP, Sonic.net, of BellSouth's petition to deregulate broadband pricing. I very much prefer to go to an alternative provider for Internet access and hope that I will have that choice in the future. If BellSouth's petition is granted, phone companies in my area could follow suit and monopolies in the ISP market, I believe, would not be beneficial to consumers. I hope that the FCC will not set an unfortunate precedent by granting the petition.

Thank you for your time.
